Neuroradiologist

Jefferson Radiology, established in 1963, is a 60+-physician-owned sub-specialty group practice based in Hartford, CT. The all-digital practice, with enterprise PACS capabilities, interprets close to one million exams a year. The largest radiology private practice in Connecticut, Jefferson Radiology has 10 private outpatient offices with multiple modalities offered in each. We are the exclusive provider of Radiology Services for seven hospitals in Connecticut and Massachusetts, including an 800+ bed tertiary facility and major teaching hospital, a tertiary pediatric hospital and several community hospitals.

The diagnostic neuroradiology section works with a wide array of highly skilled referring subspecialists, which include both pediatric and adult neurosurgeons, neurologists, and ENT surgeons. In addition to interpreting diverse and complex pathology with utilization of advanced imaging techniques, the section covers several multidisciplinary conferences at both hospitals and functions as an integral part of the patient healthcare team. Jefferson Radiology has a dedicated neurointerventional radiology section that maintains an accredited stroke service.

The ideal candidate for this position should have a strong background in all facets of neuroradiology including pediatric neuroradiology and head and neck imaging, as well as a CAQ in neuroradiology (or eligibility to get a CAQ within 1 year of joining the organization). While the group would prefer candidates with 2 years of fellowship training and/or some practice experience, all appropriate applicants will be considered.

Jefferson Radiology offers the full spectrum of diagnostic imaging and interventional services. As leaders in diagnostic imaging and interventional radiology, our fellowship trained physicians and highly trained staff are committed to providing exceptional patient care and responsive service. Our clinical resources, supported by a sophisticated business and technological infrastructure, allow us to provide the highest quality care. In addition to MQSA, ACR and ICAVL accreditation, we are Joint Commission accredited. Further, we were named by Radiology Business Journal as one of “The Fifty Largest Radiology Practices” in the country.

In addition to our patient services, Jefferson Radiology operates and directs a free-standing, accredited radiology residency program at Hartford Hospital with approximately 20 residents and an active teaching program, as well as a radiology technologist training program.
