NUCLEAR MEDICINE RADIOLOGIST

Jefferson Radiology, established in 1963, is a 60+-physician-owned sub-specialty group practice based in Hartford, CT. The all-digital practice, with enterprise PACS capabilities, interprets close to one million exams a year. The largest radiology private practice in Connecticut, Jefferson Radiology has 10 private outpatient offices with multiple modalities offered in each. We are the exclusive provider of radiology services for seven hospitals in Connecticut and Massachusetts, including an 800+ bed tertiary facility and major teaching hospital, a tertiary pediatric hospital and several community hospitals.

Jefferson Radiology is looking to recruit a Nuclear Medicine Radiologist to join our growing organization. Employee or partnership-track options are available based on mutual needs of candidate and group. The ideal candidate will be a core member of Jefferson Radiology’s nuclear medicine section, which provides general nuclear medicine diagnostic and therapeutic services in multiple hospital and outpatient office settings. In addition, our practice interprets scans from both fixed and mobile PET/CT systems at our partner hospitals. We are most interested in candidates who envision driving the long term success of the nuclear medicine section and building a best-in-class practice that services our tertiary, community and office practices. Responsibilities will also include participating in resident education and interpretation of some general radiology examinations.

Applicants should have achieved or be eligible for board certification in diagnostic radiology and/or nuclear medicine with dual certification or dual certification potential preferred.

Jefferson Radiology offers the full spectrum of diagnostic imaging and interventional services. As leaders in diagnostic imaging and interventional radiology, our fellowship trained physicians and highly trained staff are committed to providing exceptional patient care and responsive service. Our clinical resources, supported by a sophisticated business and technological infrastructure, allow us to provide the highest quality care. In addition to MQSA, ACR and ICAVL accreditation, we are Joint Commission accredited. Further, we were named by Radiology Business Journal as one of “The Fifty Largest Radiology Practices” in the country.

In addition to our patient services, Jefferson Radiology operates and directs a free-standing, accredited radiology residency program at Hartford Hospital with approximately 20 residents and an active teaching program, as well as a radiology technologist training program.
